

LOGIN to VPN via NetConnect Client

At the “JPL TFA Secure Access VPN” login screen

1. Enter your JPL username and Passcode.
Your Passcode is your PIN followed by the Tokencode together on the same line, no spaces.

For Example:

If your **PIN** is **1111** (created by you) and your **Tokencode** (displayed on your token) is **28349779** (8 digits soft token, 6 digits physical), then your **Passcode** is **111128349779** (no spaces)

Note: Tokencodes change every 30 seconds and can only be entered once in the 30 second window. If you mistype the PIN or tokencode, then you must wait for a new code.

LOGIN to VPN via the Web

- 1 Login to TFA VPN by typing <https://vpn.jpl.nasa.gov/tfa> into your browser
- 2 Enter your JPL username and Passcode.
Your Passcode is your PIN followed by the Tokencode together on the same line, no spaces.

For Example:

If your **PIN** is **1111** (created by you) and your **Tokencode** (displayed on your token) is **28349779** (8 digits soft token, 6 digits physical), then your **Passcode** is **111128349779** (no spaces)

LOGIN via BrowserRAS

BrowserRAS - <https://ras.jpl.nasa.gov>

1. Access BrowserRAS by going to <https://intranet.jpl.nasa.gov>

2. Enter your JPL username and Passcode.

Your **Passcode** is your **PIN** followed by the **Tokencode** together on the same line, no spaces.

4. Click "Connect"

JPL Network Service

JPL Intranet (BrowserRAS)

Username

→ Password/Passcode

Realm

Note: There is a 1 hour idle time-out and a maximum session length of 2 hours.

You will need an approved JPL RAS account for full access to JPL's Internal Web Pages and advanced BrowserRAS features. For more information, or to obtain a JPL RAS account, go to the JPL Remote Access Service website at <https://ras.jpl.nasa.gov>.

This computer is funded by the United States

LOGIN TO VPN on your Smartphone

To access VPN on your smartphone (iPhone, Android 4.x) you will need to download and install Junos Pulse.

For detailed instructions go to <http://ras.jpl.nasa.gov/vpn.php> → Install and Use VPN → iPhone/iPad → How to Install. Note: Android Instructions are not yet posted. The App is easily accessed at the Play Store.

When using VPN on your smartphone, the field might look too small, however, your entire PASSCODE will fit.

Passcode = PIN followed by Tokencode

TIP: Type your PIN first, then type in your 6 digit physical tokencode or use the cut/paste feature on your smartphone to enter your 8 digit soft tokencode.
